GOLD AND PLATINUM.

A letter from Prof. Dawson, chief of the geological survey, Ottawa, was received recently by Geo. Patches. Mr. Patches had made enquiries as to the practicability of using the cyanide process in extracting fine gold from the black sand. The letter says:

"Respecting the project of using the cyanide process to save free gold from the Saskatchewan river, my opinion is that it would be very difficult to make it a success. The amount of material to be treated would, I fear preclude the economical treatment for gold."

"It would require in the first instance to be concentrated, and in that case the gold might as well be extracted from it at once. And again, although much of the gold is very fine for placer gold, the grains are large enough to prove very refractory in solution, to cyanide."

"The best method of saving such fine gold would be, I think, to employ large concentrating tables like those used for similar work in New Zealand, with a width of probably 100 feet, over which a steady stream of the auriferous sand passes uniformly. The water after being freed from all the large stones and coarse stuff. The surface of such tables is covered with blanketing or coconut matting."

"Respecting platinum. The only practicable method of extracting it from the sand is to obtain it by washing and concentrating, mixed with the gold, from which it is sufficient to present to be of value, it can afterwards be separated."

BY-LAW NO. 116.

A By-Law to authorize the Municipality of the Town of Edmonton to subscribe 25 shares to the amount of \$50,000.00 in the capital stock of the Edmonton District Railway Company.

Whereas, a petition signed by at least three-fourths in number of the ratepayers of the Municipality of the Town of Edmonton, entitled to vote on by-laws requiring the assent of the electors, has been presented to the Municipal Council of the said Municipality for the passing and due ratification of a by-law to authorize the Municipality of the Town of Edmonton to subscribe for shares to the amount of \$50,000.00 in the capital stock of the Edmonton District Railway Company;

And Whereas, the said, the Edmonton District Railway Company contemplate constructing, maintaining and operating a line of railway near to and within the Municipality, and the Municipality is, in the opinion of the Municipal Council, interested therein;

And Whereas, it is deemed expedient that the Municipality should subscribe for shares in the said, the Edmonton District Railway Company, to the amount not exceeding \$50,000.00, subject to such conditions to be agreed upon between the Municipality and the Company, prior to such subscription as shall appear necessary and expedient to the Municipal Council for the protection of the interests of the said Municipality;

And Whereas, for the purpose aforesaid, it is necessary to borrow the amount of the sum to be subscribed for, either in one sum or in several sums from time to time, as it becomes necessary to pay the calls upon the stock;

And Whereas, it is expedient that the subscription moneys when raised shall be raised by the issue of debentures aggregating the said sum of \$50,000.00, payable in twenty years, bearing interest at the rate of six per cent, payable half yearly;

YUKON.

The official report of Inspector Constantine, commanding the Yukon detachment of the N. W. M. P. is to hand. They arrived at Fort Cudahy on Wednesday, July 24th, at 6 a.m. and finished discharging their cargo on the evening of Thursday the 25th. On Friday, 26th July, Inspector Strickland and a party started up the Yukon on the steamer "P. R. Wear" for the purpose of getting out logs with which to build the post. Their first camp was made on an island about 30 miles from Fort Constantine where a few logs were got. The camp was afterwards moved higher up the river to a small creek where good timber was found. Some of the logs were 28 to 30 inches in diameter. The labor of getting them out was great, everything having to be done by main strength, not having any appliances other than blocks and tackle. The underbrush was very thick, the ground a swamp, and the flies beyond description. The party at the end of three weeks brought down 400 logs of various sizes. This number was not sufficient, and owing to the lateness of the season, 250 more were bought. The report shows that laying out of the site of the post entailed much hard work which was continued in spite of the weather. If it was not 90 degrees in the shade, it was pouring rain. At any time the men were working up to their ankles, and sometimes up to their knees in water. The labor of stripping the moss was particularly severe. Moss is the bane of this part of the country. It varies in thickness from one to three feet and immediately under it lies clear white ice. The buildings were so far completed that the men moved into quarters on Monday 7th October, 1895. Eight buildings were built consisting of barracks, guard room, sergeants quarters, Inspector Constantine's quarters, Inspector Strickland's quarters, assistant surgeon's quarters, store house and hospital.

Cordwood is \$8 per cord in 8 foot lengths and the detachment burned two cords a day. The miners decide whether it is too cold to work by hanging a bottle containing mercury outside the house. If the mercury freezes it is time to remain inside.

Moose and caribou were plentiful, but fish was scarce. Mining has been done so far with pick, shovel, rocker, and water, but it is stated a small stamp mill will be put up this season. Freight a distance of 85 miles costs 30 cents per pound by men in summer and 10 cents per pound by dogs in winter. It is estimated \$250,000 was the output of gold last summer and winter. No serious crimes are reported. One man was fined \$100 for selling liquor to Indians.

The Inspector asks for a steam launch and a saw mill for the use of the detachment. It is believed smuggling will be attempted this summer and the establishment of a post up the river is recommended. Civil courts are much needed, and a survey system for describing mining and other claims.

Temperature ranged from 48 to 65 below zero. The medical officer reports 18 cases of sickness.

The above is a summary of the report.

SOUTH AFRICA.

A cable from Cape Town of recent date regarding the position at Bulawayo says:

The British have made a sortie in force, encountered large numbers of Matabeles and inflicted great loss upon them and suffered some loss in return. They were at one time in danger of annihilation and finally retreated. A force of about 300 men, under Capt. Napier, and Duncan, with one Maxim rapid-firing gun and a Hotchkiss quick-firing gun, belonging to the flagship, St. George, mustered outside the barbed-wire defences and were served with a ration of rum and saddled up for a dash at the enemies lines. The swords and all clattering accoutrements were deadened with cloth and the feet of the horses composing the advance guard, "bagged" (hoofs covered over with strong sack.) The advance guard charged right up to the mound behind which the Matabeles were entrenched and spurred their horses over them in several places. Then followed a set-back for the troopers. The Matabeles charged in force and drove the advance guard back, being met by the main body of the Bulawayo force. Fire was opened at about 400 yards on the Matabele position. This was kept up until broad light, when an advance was

ordered in view of the fact that too much ammunition was being wasted. Up to this time the loss on either side had not been heavy, although the Matabele had by far the worst of it, especially when the Maxim and Hotchkiss were brought into play to cover their retreat. At the advance on the Matabele position the two rapid firing guns were again set to work, and for about a quarter of an hour made to sweep the Matabele position in front of the British force. When the right moment seemed to have arrived a charge was ordered and there was a prolonged period of sharp fighting at close quarters. Pistols, rifles, shot guns, assegais, warclubs, spears and knives clashed prettily, the music of the rapid firing guns, sent to the rear, for fear of their being captured, having ceased. Both sides fought bravely. It was a case of a handful of well armed whites, against a small army of badly armed Matabeles. The former were fighting for the helpless women and children in the beleaguered town of Bulawayo; the latter were fighting for what they considered to be their own, their native land. Gradually the Matabeles pressed onward and by sheer force of numbers, almost surrounded the British, who to avoid being encircled, retreated, fighting foot by foot and being driven steadily backward; one squad for a time being quite cut off and only extricated itself by a brilliant charge through the Matabeles' cordon.

Eventually the British were very hard pressed, using ground fast and then rallied by Napier and Duncan, they again assumed the offensive and drove back the swarms of natives under a slow but well directed fire.

Then it was the turn of the Matabeles to give ground, and a squad of troopers, charging with a ringing cheer, threw them into confusion and the British were apparently getting the upper hand, slowly forcing the enemy backward, when suddenly a retreat was ordered. The British began to fall back and finally returned to Bulawayo which place they reached considerably the worse of wear and tear. Much heroism was displayed by individual British troopers and volunteers in rescuing their wounded comrades.

The Toronto Globe of April 22nd says: Baron Maurice de Hirsch, the great financier, philanthropist, died last night on his estate of apoplexy. No man who has acquired such vast riches has ever used them to better purpose. His charities in Austria and Germany are innumerable, and his scheme for transplanting his unfortunate co-religionists to South Africa cost what any ordinary person would consider a colossal fortune. In Egypt and European and Asiatic Turkey many schools, educational and industrial were founded and maintained by the baron. For instruction in Galicia he gave \$2,000,000. To Russia he made a magnificent offer of \$10,000,000 for public instruction, with this sole proviso: "That no distinction should be made in the application." The Russian government declined. Throughout the Canadian Northwest the name of Baron Hirsch is well known he having established colonies in the Territories. In these colonies he was much interested.

Judicial Sale!

—BY—

PUBLIC AUCTION
OF VALUABLE
MILL PROPERTY

Pursuant to the judgment and decree of the Court, entered in the office of the Deputy Clerk of the Court for the Northern Alberta Judicial District at Edmonton, the 23rd day of August, 1895, in the matter of a certain suit wherein Peter Fridus was plaintiff and James C. Squerebrigg, August Squerebrigg and Emeline Delitz were defendants, and pursuant to the order of the Honorable Mr. Justice Rouleau, dated the 23rd day of March, A. D. 1896, there will be offered for sale by public auction

SATURDAY, M'Y 2nd, A. D. 1896.

At the Sheriff's Office, in the Town of Edmonton, at the hour of two o'clock in the afternoon, the following described lands and premises, namely:

All that portion of the southeast quarter of Section thirty-one of Township fifty-two in Range twenty-three, west of the Fourth Meridian, in the District of Alberta, more particularly described as follows: Commencing at a point on the line between Sections thirty-one and thirty-two in the said Township nine chains and sixty-nine links from the north of the southeast corner of said Section thirty-one, thence west eight chains and fifty-eight links to a post planted, thence north eighteen chains and sixteen links to a post planted, thence east eight chains and fifty-eight links to a line between said Sections thirty-one and thirty-two, thence south along the line between said Sections thirty-one and thirty-two eighteen chains and sixteen links to the place of beginning, containing (14.75) acres, more or less; and also that portion of the southwest quarter of Section thirty-two in the said Township, more particularly described as follows, that is to say: commencing at the said point on the line between Sections thirty-one and thirty-two, thence east eight chains and sixty-nine links from the north of the southeast corner of said Section thirty-one, thence east eight chains and fifty-eight links to a post planted, thence north eighteen chains and sixteen links to a line between said Sections thirty-one and thirty-two, thence south along the line between said Sections thirty-one and thirty-two eighteen chains and sixteen links to the place of beginning, containing by admeasurement 14 and 72/100 acres, more or less, thence east eight chains and fifty-eight links together a perfect rectangular plot of land, containing by admeasurement 29 and 44/100 acres, more or less, together with all mill dams, mill rights, rights of way, easements and privileges connected therewith or appertaining thereto, and all buildings, mills and machinery and plant, of every nature and kind, and all personal property, furnishings and contents in any way connected with the said land property, whether situated on the same or elsewhere.

The property above described is the late partnership property of the firm of Proden & Squerebrigg, and consists of saw and grist mill, including saw mill machinery, but, however, including both turbine wheels, situate on the Sturgeon river, 22 miles from Edmonton and one-half mile from New Lannon Post Office.

Terms and conditions will be made known at time of sale.

Further and better descriptions of the property can be ascertained by inquiry from

C. M. WOODWORTH,

Advocate for Defendant Emeline Delitz.

Or from W. S. ROBERTSON,

Auctioneer.

EDNA.

The thermometer registered 74° in the shade here on Tuesday morning. Showers of rain, the first this spring, fell later in the day.

Seeding and plowing commenced here on the 21st.

On Wednesday we had a snow storm lasting about two hours.

William Anderson is a land guide for this neighborhood.

The water is high in Beaver Creek, which no more has to be forced as Messrs. McLean, Campbell, Hackatt & Co. have erected a substantial bridge near the familiar ford on the Victoria trail.

Edna has a school teacher; it is Creekford that is without.

April 22th, 1896.

MANAWAN CORRESPONDENCE.

The snow is fast disappearing in this locality. Old settlers say it was the deepest that has been here for some years.

R. McKernan and F. Scamon, two of South Edmonton's influential citizens, spent last week here. They expressed themselves highly pleased with the townsite and are coming back during the summer to invest.

Mrs. E. P. Newall is expected on Monday's train from Washington. Mr. Newall leaves tomorrow to meet her at South Edmonton.

W. Lang met with an accident. He was splitting wood, when a piece flew striking him heavily in the eye.

Jonathan Batty had a "B" on Monday last and erected a house, shed, stable and pig pen on his new place.

C. Cadzow returned from the far north where he spent the winter hunting. He brought with him a lot of fine fur as evidence of his success. He left Mr. Monckman on the Athabasca river and he is also expected here shortly.

LACOMBE LINKS.

Mr. Adams, who has had charge of a section on the C. & E. railway between Calgary and Macleod, has moved his family on to his homestead just north of here and has charge of the section north of Lacombe.

Several young fellows left here last week for Montana by trail, and it has been remarked that some of them will be wiser if not richer by fall.

Mrs. Geo. Lemon left last week for a prolonged visit to eastern cities.

Messrs. D. G. Stewart & Co., are erecting a neat little barn at the rear of their store.

Several settlers arrived last week, some with families, about 25 persons in all and one car of effects.

Seeding is now well under way, some on the higher land being pretty well through.

Large numbers of ducks and some geese are now to be seen on the ponds and lakes.

G. A. Reid and family have moved on to their homestead for the summer.

Messrs. Thompson and Smith are burning a kiln of lime at Gull lake. They have built a large flat boat which they will use to take the stone down the lake to the kiln.

It is rumored we are to have a new hotel built here this summer, but it is not decided in just what part of the town it will be.

The Presbyterians of Ponoka are just completing a new log church, which we are informed when finished will be out of debt.

The Rev. Mr. Goodman, Church of England minister who has been preaching here for some two years, has gone to Lethbridge.

GENERAL NEWS.

A special from St. Petersburg says:—Just at the moment when the English are thought to be occupied in other parts of the world, a telegram to the Novoe Vremya from Chemulpo announces that the British Pacific squadron has taken up a position of observation off the coast of the Korean peninsula and is being concentrated at Port Arthur and also at Port Hamilton.

The experimental farm report for 1895 says that fall plowing land for wheat is a waste of time, as it has invariably given a less return than from seed sown on the unplowed stubble. Treatment with bluestone has again proved entirely successful, eradicated smut and greatly increasing the yield. Smutty seed, not treated yielded less than 18 bushels per acre of very poor wheat. Treated in various ways with bluestone the same seed yielded 38 to 45 bushels of wheat per acre, of good grain. Yet there are still farmers who either do not treat their seed, or do it in such a careless way that a large quantity of it is rejected every year on account of smut. This case of smutty wheat is certainly an example of refusing to receive valuable knowledge. The drilling test gave similar results to previous years, as follows: Press drill, yielded 40 bushels per acre; common drill, yield 44 bushels; broadcast machine, yield 37 bushels per acre. The wheat sown with the press drill ripened three days ahead of the common drill and six days ahead of the broadcast sowing. In the tests as to date of sowing, the result is about the same as in former years. The earliest sown plots

ripened the first for both wheat and oats, but the yield was not as large as from plots sown later. While wheat has done better sown on stubble than on either spring or fall plowing, oats and barley have done better on spring plowing. Grain should only be sown on stubble, however, when the land is free from weeds, after a crop on summer fallow.

A despatch from Ottawa says: The imports for nine months increased \$5,750,000. The duty collected shows an increase of \$2,000,000. The export increase is \$5,821,000.

An order-in-council has been passed giving the schedule of fees to be exacted by several registrars of land registration districts for services and duties connected with the Northwest irrigation act. In the event of the registrar being called upon to perform some service for which a fee is not provided by tariff he is authorized to charge a fee which he has power to exact for a similar service under provisions of the land titles act of 1894.

The London Daily News publishes a despatch from Constantinople saying that news from all parts of Armenia continues to be terrible. The people everywhere hardly dare resume work and the farmers are wholly without seed. Unless the government extends help to them speedily there will be no sowing. The local officials have applied to the government for assistance, with a view to averting a famine next winter. The relief disbursers at Guran have been arrested and nobody else dares to act. In the meantime many persons are dying of hunger.

The Free Press says: It is reported that Cuban rebels are surrendering. Guaranteed reforms and promises of pardon are proving more effective than General Weyler's usual methods of subduing rebels.

A despatch from Cape Town to the Times says: It is reported from Johannesburg that numerous Boer wagons, all in charge of white men, with no Kaffir driver are leaving Pretoria with ammunition and field equipments, their destination being unknown. The Boers, it is further said, are in constant communication with the wagons departed.

COUNCIL MEETING.

A meeting of the town council was held on Tuesday evening, all the members being present except the mayor.

Communications were read from the Edmonton board of trade asking that financial aid be given, if within the powers of the council, towards establishing a free public ferry across the Saskatchewan at Clover Bar and suggesting that \$100 granted for that purpose would be a good investment for the town. From Beck & Emery re by-law and from W. McLeod, post office inspector re petition from South Edmonton as to post office.

Cowie—Sutter. That communication from the board of trade be referred to solicitor for his opinion as to the legality of the town granting the request. Carried.

Edmonton—Kelly. That the board of trade be asked to take up the matter of the petition sent to the post office inspector. Carried.

The clerk was instructed to file the letter of C. W. J. Haworth and notify him that the town is not liable.

With reference to the petitions of ratepayers on Nemayo avenue asking that sidewalk be built a motion by Sutter—Edmonton that the contract be let and work proceeded with at once was lost, as was also an amendment by Cowie—Bellamy that contract for same be not let until proper inquiries as to the financial standing of the town had been made. The matter was finally disposed of by a motion by Edmonton—Cowie, that the clerk be instructed to ask Messrs. Manson and McLeod if they will hold their tenders for two weeks, which was carried.

Cowie—Bellamy. That report of the board of works be received and adopted.

Sutter—Cowie. That the report of the board of works regarding tanks be referred back with request to bring in a report as to the probable cost of putting the defective tanks in repair.

Bellamy—Kelly. That report of the health and relief committee be received and adopted.

Bellamy—Cowie. That report of the finance committee be adopted.

Bellamy—Edmonton. That the report of the finance committee regarding collection of taxes and auditor's report for January, February and March be received and adopted.

Sutter—Bellamy. That rules 45 to 50 be suspended and Bylaw No. 116 be introduced and read three times at this meeting of the council.

By-law No. 116 was then read first, second and third time.

Sutter—Bellamy. That by-law 116 be provisionally adopted.

Bellamy—Cowie. That clerk be instructed to ask for tenders for the publication of by-law No. 116 and to accept the lowest tender.

Sutter—Kelly. That the instruments of the fire brigade band being in a satisfactory condition, the request of the band for the purchase by the town of an E flat bass for the sum of \$50 be granted.

Acting Mayor McCauley appointed Councilors Edmonton, Bellamy and Kelly a committee to arrange for reception of Mayor Wilson on his return.

The following accounts were ordered to be paid:

Salaries,	\$105.00
C. P. R. telegraphs,	9.18
Edmonton Hardware Co.,	1.89
Electric Light Co.,	55.35
Edmonton Herald,	4.00
Cann & Co.,	53.00
Dominion Express Co.,	44.15

The meeting then adjourned.

Hugh John Macdonald will probably contest Winnipeg.

W. W. McDonald has issued his election address as a conservative candidate for Eastern Assiniboia.

James H. Ashdown, the hardware merchant of Winnipeg, has been adopted as the liberal candidate for Marquette.

The Freeman Labor Journal published at Spokane, Washington, has a tax sale advertisement covering seventeen pages of six long columns each.

The Toronto Globe says: A large deputation from Montreal waited on the government at Ottawa, asking a grant of half a million towards a World's Fair in that city next year. Premier Bowell and Sir Charles Tupper expressed sympathy with the enterprise, but declined to promise any financial aid until assured that Toronto's proposed exhibitions would not conflict with it.

The flowers that bloom in the spring tra la,
Have nothing to do with the case tra la.

The poet was in error; this is wrong. They have something to do with the case. They have a mission to perform in cheering the heart of man for whom all things in this universe have been ordered. A springtime is a necessity for all things animate or inanimate. We have a rare lot of goods on hand in the springtime of their existence, and we wish nothing better than to see them blossom into summer on the persons of our customers.
